

Code-Layout, Readability and Reusability

Date	02 october 2026
Team ID	6ab63861dcdae33acb394aaf
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	4-space indentation standard followed
2	Proper File Structure	Files and folders are logically organized	Yes	Modular: Script Includes, Business Rules, UI Pages
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Descriptive names like aclRuleSet, userAccessLevel
4	Function / Method Names	Functions are descriptively named	Yes	Functions like validateACLScript(), applyBulkRules()
5	Code Comments	Inline and block comments explain logic	Yes	JSDoc-style comments for all public methods
6	Modular Design	Code is split into reusable functions	Yes	Separate Script Includes for validation & execution
7	No Redundant Code	Duplicate or unused code is removed	Yes	DRY principle followed; shared utilities extracted
8	Error Handling	Exceptions and errors are handled	Yes	Try-catch blocks with GlideSystem error logging

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	ACLScriptValidator	JS (Script Include)	Editor, bulk import	High
