

Performance Testing

Date	02 october 2026
Team ID	6ab63861dcdae33acb394aaf
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	ServiceNowPerformance Analytics, Postman (forAPI testing)
Type of Testing	Load Testing, Stress Testing, Functional Testing
Target Module / API	ACL Script Execution Engine, REST API endpoints
Test Environment	ServiceNow Personal Developer Instance (PDI)
Test Date	25 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1 1	ExecutesingleACLscriptwith10rules	1	30 sec	All rules applied within 3 seconds
2 2	Bulk ACL operation with 100 rules	5	60 sec	All rules applied within 15 seconds
3 3	Concurrent admin script executions	10	120 sec	No timeout or conflict errors
4 4	Dashboard data load with 1000+ ACL records	20	60 sec	Dashboard renders within 5 seconds

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time	< 2 seconds	3.8 seconds	Pass	Max during bulk ops
			8.2 req/sec	Pass	Efficient concurrency
2	Response Time	< 5 seconds	0.3%	Pass	Minor timeout under load
3	Throughput	< 80%	45%	Pass	Handles load easily
4	Error Rate	< 1%	52%	Pass	Memory stable during tests
5	CPU Utilization	< 80%			

Observations & Analysis:

The Script Controlled ACL system demonstrated strong performance across all test scenarios. Single script execution consistently completed within 1-2 seconds, well below the 3-second target. Bulk operations with 100 rules completed in ~12 seconds, showing linear scalability. The system handled 10 concurrent admin sessions without deadlocks. ServiceNow's native caching and indexing mechanisms contributed significantly to high query efficiency in dashboard tests.
